

Environmental Policy

Canal Movers & Logistics Corp.

Environmental Policy

"We are committed to maintain and protect the natural resources of Panama, fostering a culture of conservation and environmental restoration."

To comply with all standards and environmental conservation policies governing in Panama and meet ours, thus contributing to preserve the biodiversity that exists in the country, being responsible with all our waste and emissions.

Our company is in the middle of the Metropolitan Natural Park, a protected area within Panama City, Panama. Therefore, we maintain strict environmental protection policies that are consistent with the environmental programs of our country. This is in addition to the responsibility we feel with the natural resources of Panama.

The Metropolitan Natural Park consists of 265 hectares of forest and is one of the few parks in the metropolitan area in Latin America. It contains a rich biodiversity, populated by birds, butterflies and small mammals. To one side of the Panama Canal is the only Park Rainforest in the American Tropics, located in a city.

Basic rules of environmental protection policy

- Use second-use boxes in good condition.
- Separate waste according to its composition: paper, cardboard, plastics, wood and metals.
- Acceptance of a certain percentage of recycled material in the manufacture of boxes, corrugated cardboard and plastic.
- Care in consumption and water use in our facilities.
- No smoking signs in offices and warehouses.
- Permanent maintenance of trees and green areas outside our facilities.
- Preventive maintenance plan of our transport units in order to eliminate toxic emissions.
- Noise Control.
- Spraying plan with non-toxic environmental materials.
- Saving electricity policy and periodic verification of facilities.
- Use of wood waste (sawdust) for improving green areas.
